Currently seeking for an internship in Frontend developer to apply academic knowledge in practice, gand hands-on experience, and steadily build stronger expertise in **Software Development** field within the next 3-5 years.

EDUCATION

Bachelor's Degree in Software Engineering **Oct 2022 - Present**

Ho Chi Minh City University of Technology

- Culmulative GPA: 3.44/4.00

Achievements:

- Received the Outstanding Student Award (Second Semester, 2023)

PROJECTS

Project Management System (Jira/Notion inspired) **Oct 2025 - Dec 2026**

Frontend Developer

Description: A project management platform inspired by Jira/Notion, featuring dynamic Kanban boards, charts, and seamless collaboration tools.

- Implemented native **Drag & Drop API** and **Optimistic UI** updates for a smooth, desktop-like experience using Tailwind CSS.
- Developed robust rendering logic for complex components, including multi-tab modals and interactive dashboards (Chart.js).
- Engineered a custom **JWT Authentication** system and handled complex asynchronous data synchronization for Burn-down charts and Gantt views.

Github: https://github.com/mquy27/ProjectManagement.

Tech stacks: HTML, TailwindCSS, JavaScript, C#, SQL Server, .Net Core.

Personal Portfolio **Jan 2026 - Present**

Frontend Developer

Description: A highly interactive, mobile-first portfolio built to showcase frontend capabilities and UI/UX design thinking.

- Architected a responsive layout utilizing **React, Vite, and Tailwind CSS**, featuring custom noise textures and CSS gradients.
- Implemented advanced, fluid web animations and parallax scrolling effects using **Framer Motion** and **GSAP**.

Github: https://github.com/mquy27/PortfolioV2

Live Demo: https://mquysportfolio.vercel.app

Tech stacks: React, JavaScript, HTML5, TailwindCSS.

Kim Kỳ Ceramic **Feb 2026 - Present**

Frontend Developer, UX/UI Designer

Description: A high-end e-commerce showcase featuring modern UI/UX architecture and headless CMS integration.

- Prototyped a cohesive design system in **Figma** and translated it into a pixel-perfect frontend.
- Architected a dynamic 'Page Builder' using **Sanity CMS** and **GROQ**, empowering non-technical editors to create magazine-style layouts.
- Elevated the brand's identity with native-like mobile interactions (CSS Scroll Snap, Bento Grid) and sophisticated micro-interactions via **Framer Motion**.
- Optimized application performance and technical SEO utilizing **Next.js Server Components**, URL state management, and automated JSON-LD markup.

Tech stacks: Next.js, TailwindCSS, TypeScript, Sanity CMS, Figma.
